

COMPANY PROFILE

STRATEGIC LOCATION

- Established in Kano, Nigeria in 1989, Fas Agro is an industrial firm specializing in the production of woven polypropylene packaging.
- Over the last 30 years, Fas Agro's investment in staff and machinery has seen the company grow to become a major provider of flexible woven polypropylene packaging in Nigeria and neighboring countries.

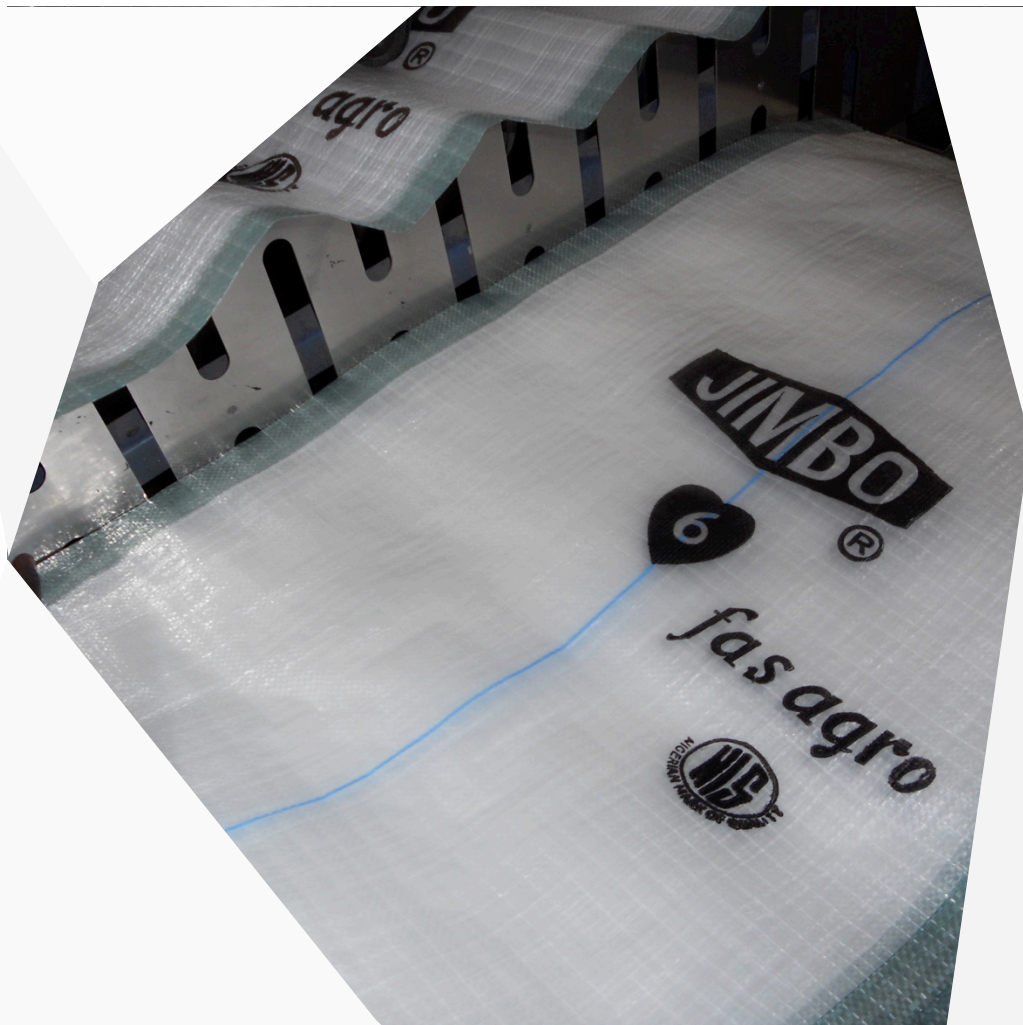

OUR VISION

We strive to continue to develop our innovative organization with an empowered and motivated workforce, with strong emphasis on quality and operational excellence.

OUR MISSION

To be the largest and most efficient woven polypropylene bag manufacturer in Nigeria, through the use of the most modern machinery, a well-motivated workforce, and a strong partnership with our customers.

CORPORATE SOCIAL RESPONSIBILITY

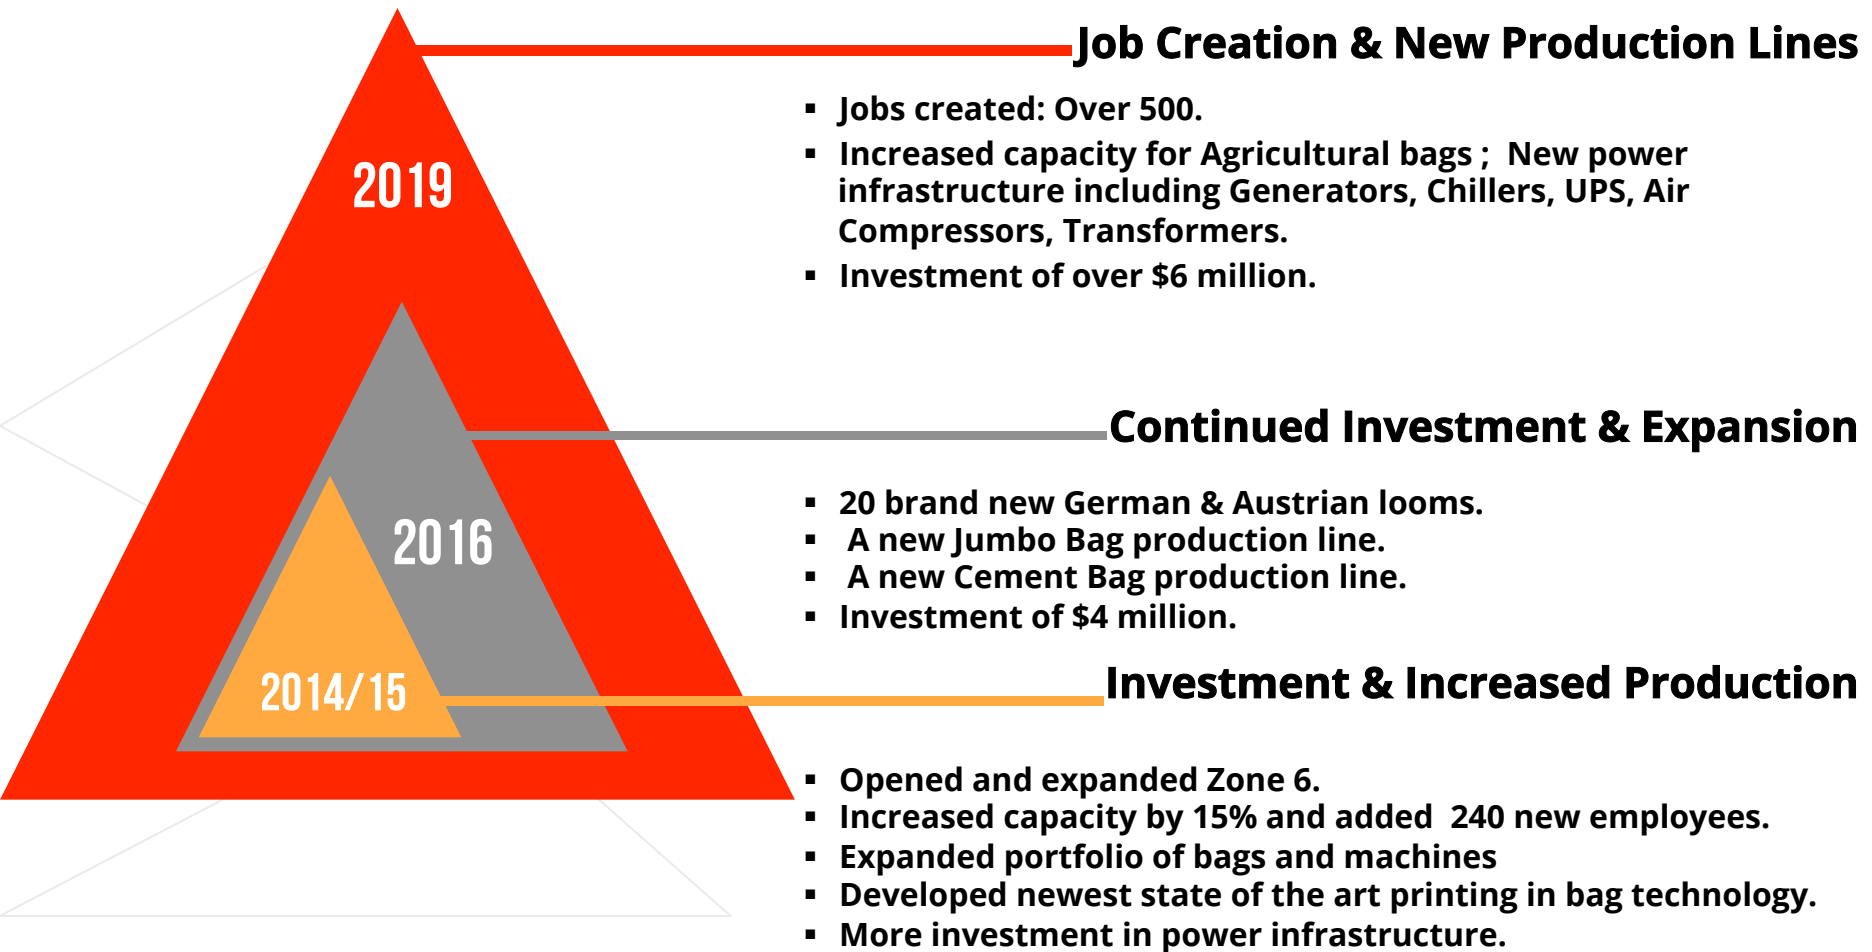

**FAS AGRO TAKES PRIDE IN
WORKING TOGETHER
WITH OUR COMMUNITY
FOR OUR COMMUNITY**

Fas Agro is a real and active partner in the progress of our community. We are heavily invested in the development of our surroundings and the protection of the environment.

- Partnering with the Kano Fire Department and making all our equipment/resources available for their use when needed.
- Continuous tree plantation in an effort to reduce carbon emissions.
- Building gutters and developing a sewage system for those around us.
- Tarmacking over 4 km of roads in Sharada area.

EXPANSION PLANS

TARGETS

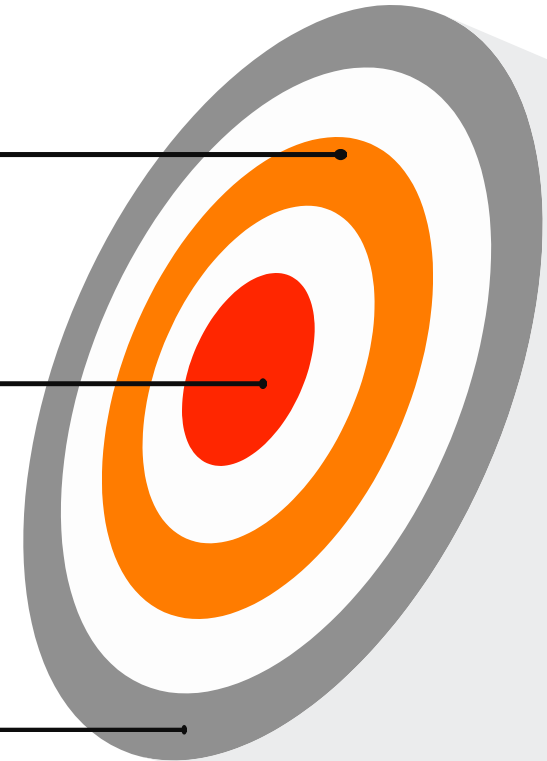

2020 PLAN

Continued Investments in state of the art technology

Maintain our position as market leaders by providing the highest quality bags and services.

Continued Community Support

COLLABORATION WITH CBN

The Central Bank of Nigeria's constant support has been a key factor in establishing Fas Agro as one of the biggest manufacturers of polypropylene bags in Nigeria. CBN's backing allowed Fas Agro to grow and cement its commitment towards strengthening Nigeria's economy and job creation.

PROMISE

After a promise was made to the then governor of the central bank (he advised us to go into industry to help Nigeria) that we are determined to play a role in helping Nigeria through economic and job growth, we started Fas Agro in 1989 as a small manufacturing company.

COMMITMENT

We received 2 SME loans from CBN, each with a value of \$1.5 million. This helped us double our capacity each time. We also repaid fully each of the loans within 2 of the 5 year period allowed.

CURRENT PRODUCTION CAPACITY

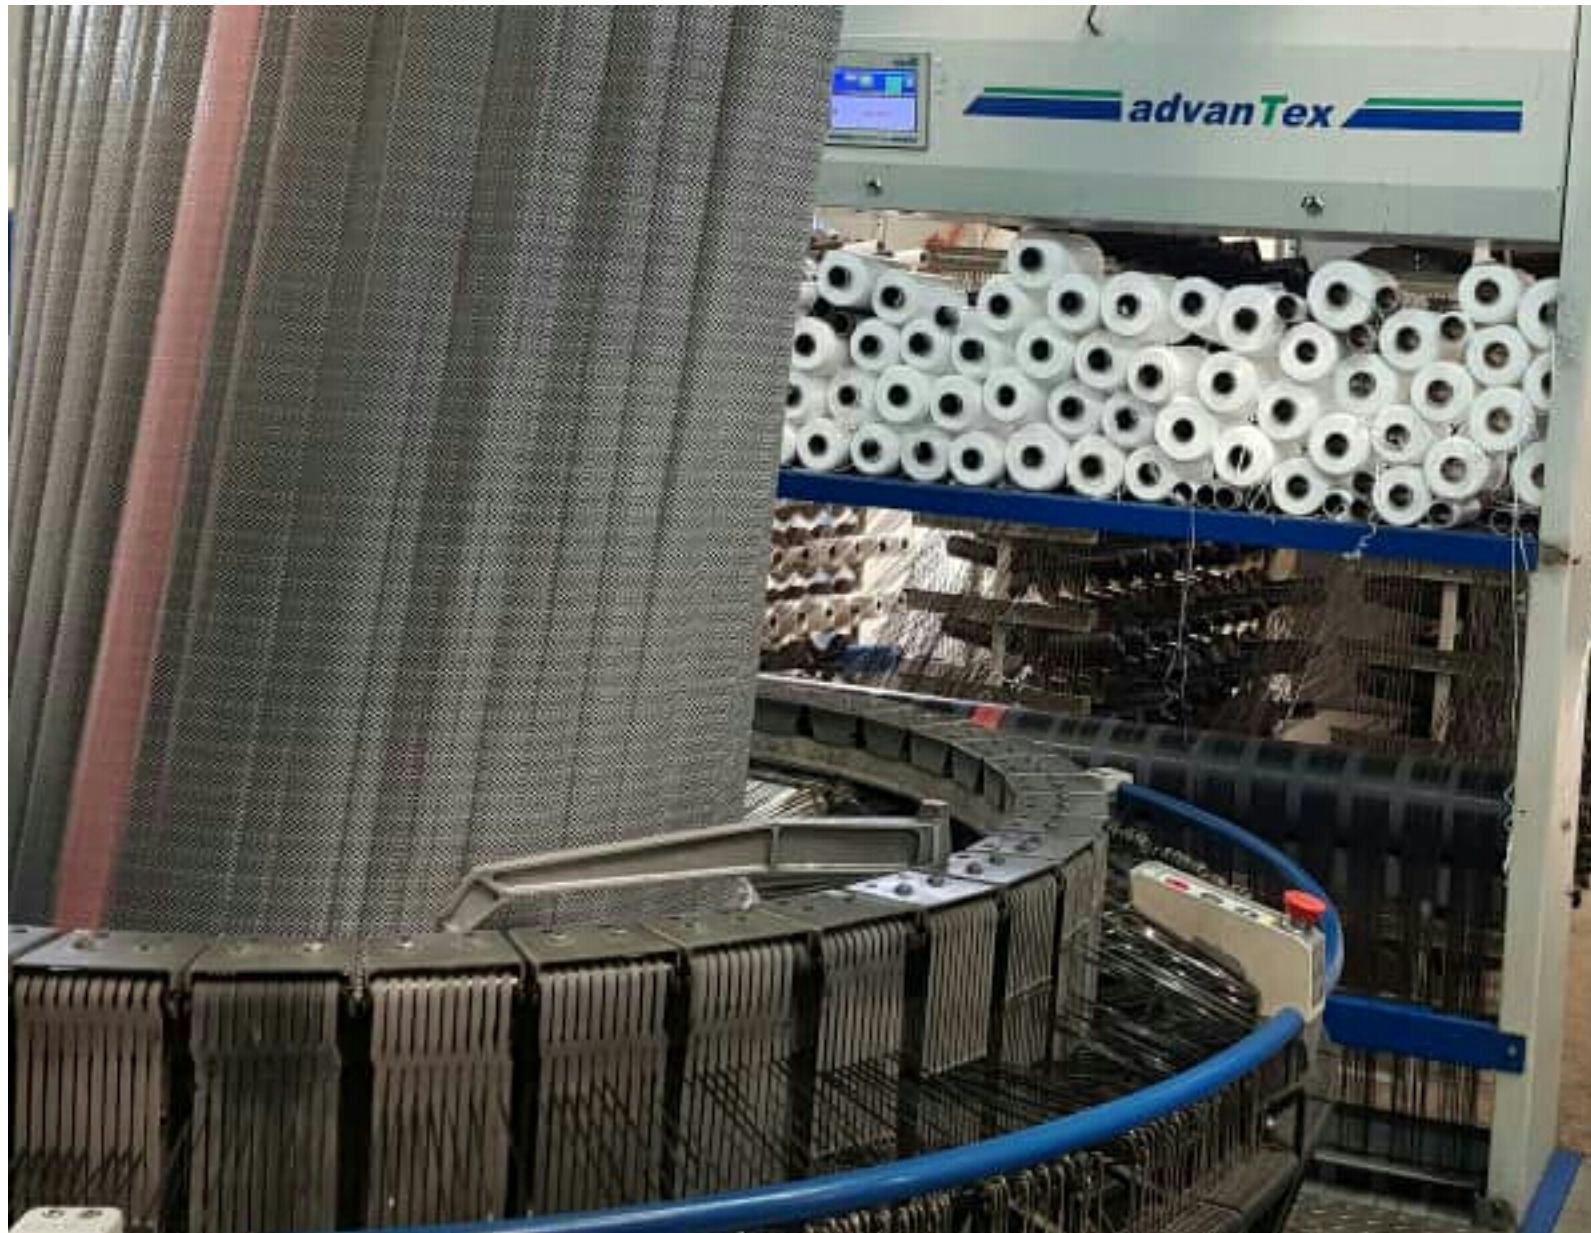

- Over 350 million bags produced per year
- 2000+ staff
- Most modern high-tech Austrian & German machinery
- 15MVA power capacity
- Over 480 Looms
- Consumption of 100 tons of polypropylene a day

ASSOCIATION & CERTIFICATION

SUMMARY

01

- 2000+ employees
- 15 MVA power capacity
- Over 3000 tons per month of polypropylene consumed
- 480 looms

02

- Current imported raw material costs of \$2.5 million monthly
- After expansion: \$3.5 million imported monthly raw material costs

03

- Expansion in the face of adversity - during a difficult security situation in the north and despite challenging economic conditions

04

- Over 350 million bags per year produced
- Highest quality and most up to date German and Austrian machinery
