

Celebrating 30 Years of Plastics Processing Excellence, Milacron India Gears up for Propak West Africa 2025

Lagos, Nigeria, September 2025 – Milacron India, a leading manufacturer of plastics processing machinery, celebrates 30 years of plastics processing excellence with a renewed focus on customer engagement and technological advancements. With a comprehensive portfolio of over 27,000 indigenous machines supporting core and niche applications across industries and geographies, the company has enabled superior productivity and shop floor efficiency.

This milestone year establishes the groundwork for a renewed, customer-focused approach that aims to elevate industry standards. As part of this journey, Milacron India will participate in Propak West Africa, reinforcing its role as a trusted partner for plastics processing.

While the company recently unveiled the roadmap for its three new machines – The 3rd Generation Direct Clamp Machine, The 3rd Generation of an All-Electric Machine, and an All-new Superior Productivity Extruder for PVC/CPVC applications – all scheduled for an official launch in 2026, the emphasis at Propak West Africa remains on reinforcing customer trust and building long-term value. For Milacron India, the exhibition represents not only a showcase of its expertise but also a catalyst to deepen partnerships and extend its reach in a global market of growing significance.

This will mark yet another step in Milacron India's journey of expanding its global footprint. As the company celebrates three decades of engineering excellence, it reaffirms its status as one of the leaders in the plastics sector, driving innovation, setting benchmarks, and shaping the future of the industry on an international scale.

About Milacron

Milacron (www.milacron.com) is a global industrial leader in the manufacturing and distribution of highly engineered and customized injection molding and extrusion solutions, and aftermarket parts and service for the plastics processing market. The company's 1,900 associates worldwide collaborate to serve a diverse range of end-markets, such as automotive, construction, medical, telecommunications, material handling, packaging, and much more. Molding and shaping its expertise in plastics for nearly 60 years, Milacron holds longstanding relationships with more than 27,000 customers around the world.
