We are waiting for you!

---

## **Sacmi, technological evolution since 1919.**

Sacmi Group heads over 80 companies in 30 countries that have achieved success in several businesses

areas: from machines and complete plants for the ceramic, beverage, packaging and food processing industries to process control solutions and quality control systems. Sacmi has, over the years, invested heavily in technological research and innovation. That constant commitment is backed up by a capacity to work alongside the customer on international markets, acting not just as a supplier of machines and services but also an all-round plant engineering partner who provides true product and process innovation that is always one step ahead of the competition. Thanks to the capacity to provide 'turnkey' plant engineering solutions designed together with the customer - who can count on close support throughout the working life of the machine or production line – and far-reaching after sales assistance that covers all five continents, 87% of Sacmi's sales are exports yet its technological and production core remains firmly in Italy, largely in Emilia-Romagna where the long-standing Imola headquarters is located.
